- Please only use the official NaU (Navigation Updater) software found on this website to download your map
 - Downloading or copying it from other sources can lead to update failures and lead to critical issues to the navigation system
- If you experience any issues while using the NaU software or before/after installation, please contact Hyundai Customer Care
- If your navigation system has a SD card, you need to use SD card for updating the software and map
 - The SD card slot is located just below/above the vehicle display screen
 - ▷ If your vehicle has a 16 GB SD card, please purchase a high-grade 32 GB SD card
 - ~ Please do not use micro SD card ~
 - ▷ If your vehicle has a 32 GB SD card, please use it to update
 - ▷ Please do not use SD card to save music or other data files
- If your navigation system does not have a SD card, you need to use a USB flash drive for updating software and map
 - ▷ Please format (ExFat) the USB before using the NaU software
- When selecting your vehicle, make sure the model/model year are correct before starting the download process
 - ▷ If the wrong model/model year is chosen, the update cannot be performed
- Please select the correct drive on your PC if you connect multiple media to your PC
 - ▷ Disconnect the media after only after confirming the download process is complete
- Disconnecting the media during the download process can lead to corrupt files and a map update failure
